

# Water Meters

## FINANCIAL IMPACTS

### Cost to the Municipality

Approximately  
\$2.3 million

The Municipality will fund this by debenture.

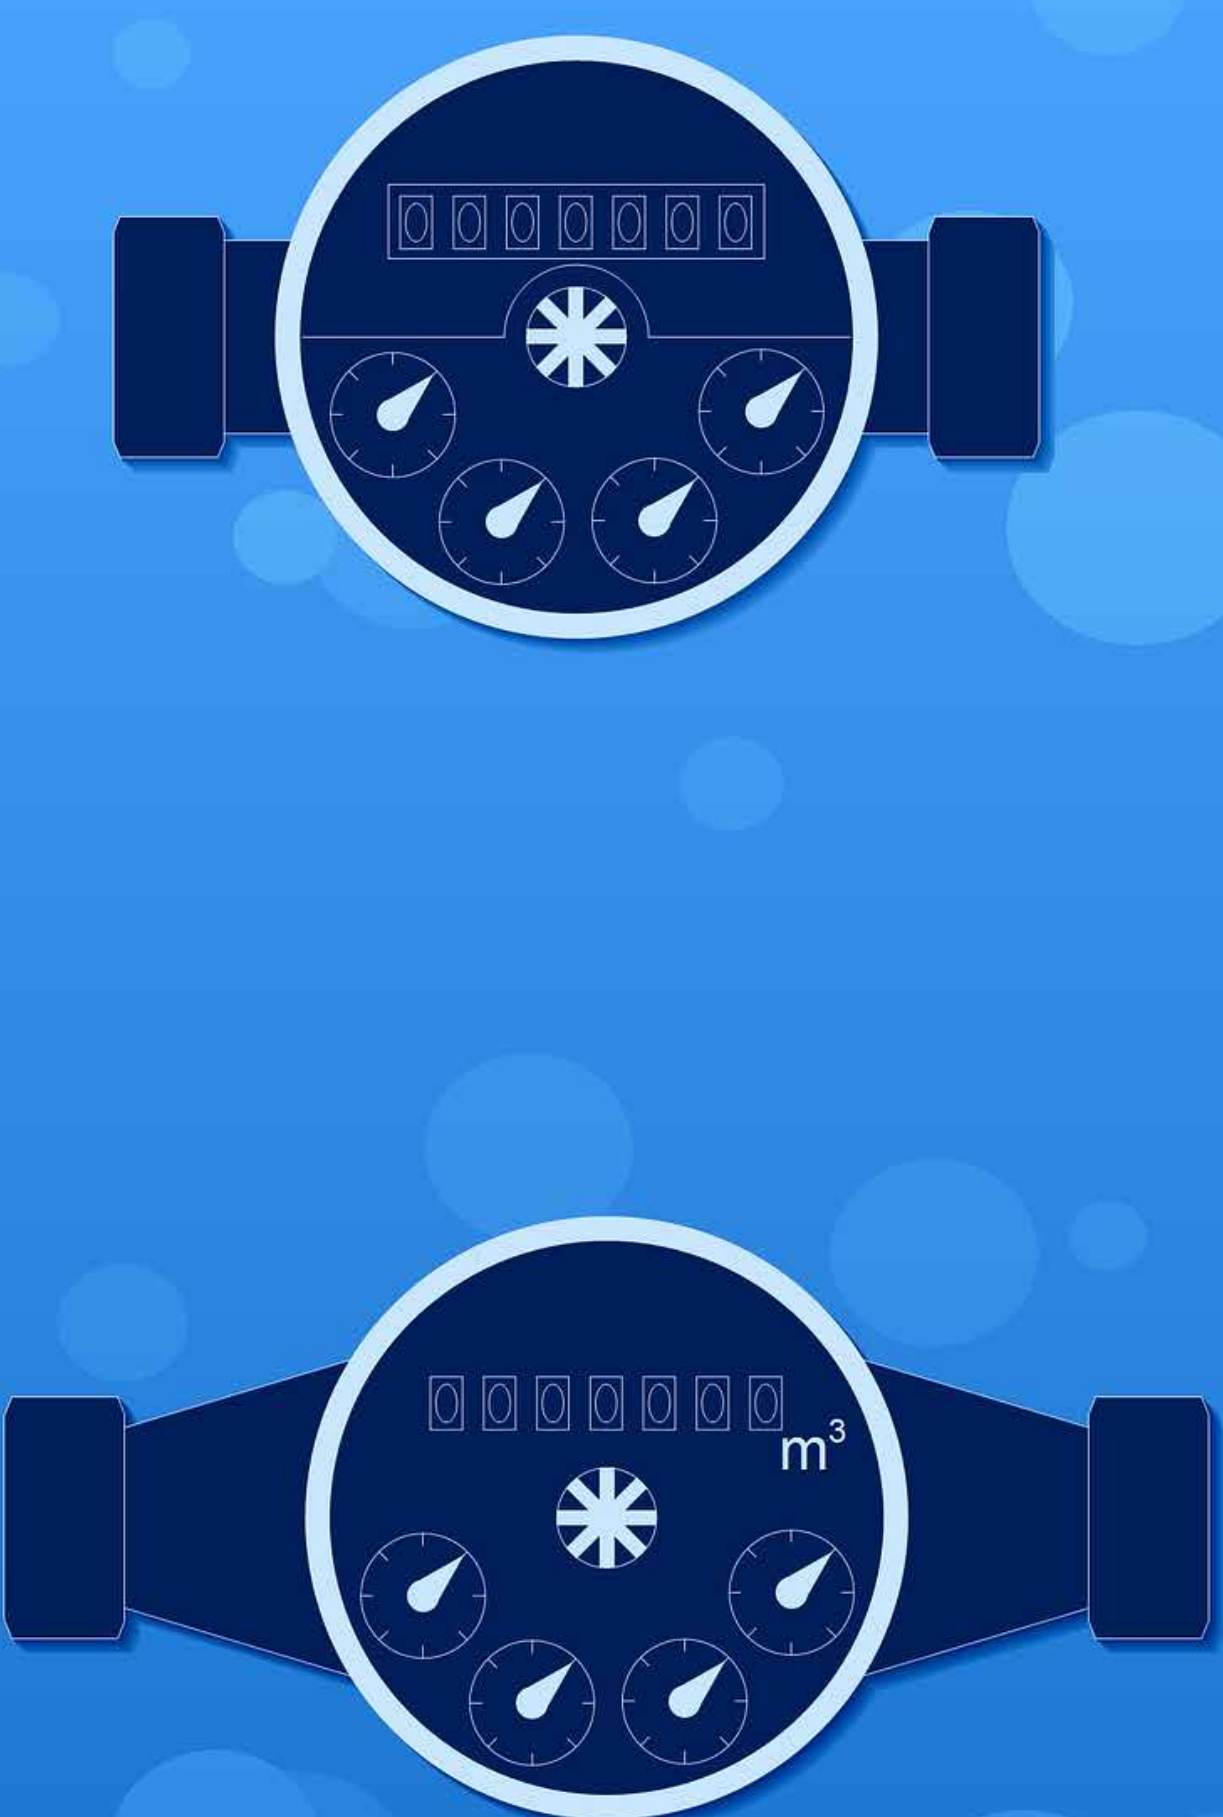

### Cost per Household

Approximately  
\$600 per home

If monthly payments are preferred, approximately \$20 per month for 3 years.

How much would you be willing to pay per month towards the cost of your water meter?

Commercial are specialized meters that will be site specific. May be up to several thousand dependent on water consumption needs.

## IMPLEMENTATION QUESTIONS AND ANSWERS

### Who will receive meters?

All customers who have a water service

### When will they be installed?

They will be installed in 2019

### How will they be installed?

A contractor will come to each property, cut a section of pipe out within the residence and install the meter.

### When will the program go live?

A final live date has not yet been determined

### How and when will meters be read?

The meters will be read remotely monthly.

### How will this affect billing and sewer rates?

Rates will be established so the average homeowner sees approximately the same bill. Low users will see savings and high users will pay more. The meters also have the added benefit that they can notify on the next utility bill if they suspect a property has a water leak.
